Artificial Turf Surfaces for High-Traffic Areas

There are many benefits to adding artificial turf to your high-traffic areas near or around playgrounds. However, artificial turf could be used anywhere on your grounds where you need a low-maintenance ground cover with the look of **beautiful, green grass – year-round!**

SAFE

When it comes to children, nothing is more important than their safety. Our turf provides a soft place to land; absorbing the shock of running, jumping, landing and falling. In addition, May Recreation's turf meets ADA guidelines, providing wheelchair access.

SOFT

Want the look and feel of real grass without the maintenance? May Recreation provides a soft, grass like feel for playgrounds, lawns and landscape without the seeding, mowing, and weeding.

SECURE

Worried about your pets? Our turf will stand up to the most challenging of pets. Its revolutionary drainage capabilities, along with its realistic look and feel, make it the number one choice for pet owners. Our artificial turf is fade resistant and will look great for years to come.

May Recreation specializes in the installation and distribution of artificial turf for residential & commercial use. Whether you're interested in transforming your lawn, playground, rooftop, dog run, or putting green, we are the experts. Contact May Recreation for a quote and our installation schedule today!
